Grid Solutions
a GE and Alstom joint venture

Dear Nabil,

I am writing to express our happiness and gratitude for the outstanding work you performed during your time as Grid Solutions site manager for Tarahan and Belitung sites of Indonesia Fast Power project.

Both the sites were not easy considering the extremely tight schedules and remoteness of these sites but with your perseverance, leadership and interpersonal skills you were not only able to marshal the teams to complete all erection commissioning works on time, but you also managed to achieve all that with high level of cooperation and acceptance from our end customer, PLN. Especially Tarahan site was much more complicated due to the 150KV one and half breaker switchyard brownfield extension scope and you demonstrated it was possible to erect and commission the whole of electrical balance of plant and extension of switchyard in 8 weeks without compromising on EHS aspects.

On behalf of entire Fast Power team I thank you for the exemplary work that you performed and I take this opportunity to wish you all the very best for your next assignment. It was indeed a pleasure working with you and I certainly look forward to working with you again soon.

Thanking you once again and wishing you all the very best I remain,

Saubhagya Mishra
Grid Solutions Project Director,
Indonesia Fast Power project
